

What is the current recommendation for LUNs per Volume on a FAS2820

https://kb-stage.netapp.com/on-prem/ontap/Ontap_OS/OS-KBs/What_is_the_current_recommendation...

Updated: Wed, 24 Jun 2026 07:13:54 GMT

Applies to

- FAS2820
- ONTAP 9.14.1

Answer

- Maximum LUN per volume is set at 1024 for current ONTAP versions
- IO sizing, snapshot policy and backup requirements may require LUNs being separated between volumes
- Please work with your NetApp Account team to assist with your solution requirements as this may differ depending on scale which can reduce how many LUNs per volume you create
