

Brocade switch port In_Sync state due to faulty host HBA

https://kb-stage.netapp.com/on-prem/Switches/Brocade-KBs/Brocade_switch_port_In_Sync_state_due...

Updated: Wed, 24 Jun 2026 07:13:59 GMT

Applies to

Brocade G620

Issue

- In `switchshow`, port state is `In_Sync`, instead of `Online`:

```
3 3 150300 id N32 In_Sync FC
```

- End device SFP was replaced
- Cable was replaced
- SFP of switch was replaced
- When cable is moved to another port, the issue moves to that port
