

Management IP Address is not displayed for ATTO FibreBridge after Upgrade to 9.16.1P9

https://kb-stage.netapp.com/on-prem/ontap/mc/MC-KBs/Management_IP_Address_is_not_displayed_f...

Updated: Wed, 24 Jun 2026 07:24:45 GMT

Applies to

- ONTAP 9.16.x
- ATTO FibreBridge 7600N

Issue

- After upgrading ONTAP and ATTO FibreBridge firmware, the management IP address for ATTO FibreBridge 7600N bridges is not displayed in ONTAP CLI output.

Example log output:

```
ddxxx001::> system bridge show -fields name,address
```

```

name                address
-----
ATTO_2xxx0         0.0.0.0
ATTO_2xxx0         0.0.0.0
ATTO_2xxx0         0.0.0.0
... (other bridges)

```

- The "`system bridge show`" command shows the management IP as 0.0.0.0.
- The bridges remain accessible via HTTP/HTTPS and ONTAP "`storage bridge run-cli`" commands.
- All health checks pass, and there is no impact to storage access or IO.

```

storagebridgerun-cli -name <bridge_name> -command info
storagebridgerun-cli -name <bridge_name> -command info
storagebridgerun-cli -name <bridge_name> -command info
storagebridgerun-cli -name <bridge_name> -command info

```
