

How to harden ONTAP 9 TLS configuration

https://kb-stage.netapp.com/on-prem/ontap/Ontap_OS/OS-KBs/How_to_harden_ONTAP_9_TLS_conf...

Updated: Wed, 22 Apr 2026 02:10:23 GMT

Applies to

- ONTAP 9
- Transport Layer Security (TLS)

Description

- Many security scanners flag ONTAP as not compliant to an established security baseline when scanning an ONTAP cluster for SSL vulnerabilities or weaknesses.

- This article guides you through allowing only the strongest version of TLS currently available within ONTAP 9 and strong ciphers of 128 bits or greater with which to secure communication with clients and applications granted the HTTP application access to ONTAP.
