

How to make major changes to vif configuration with minimal impact to system availability

[https://kb-stage.netapp.com/Legacy/ONTAP/ONTAP_OS_\(7_Mode\)/How_to_make_major_changes_to...](https://kb-stage.netapp.com/Legacy/ONTAP/ONTAP_OS_(7_Mode)/How_to_make_major_changes_to...)

Updated: Wed, 24 Jun 2026 08:15:47 GMT

Applies to

Data ONTAP 7

Description

- Configure a Virtual Interface (vif) to span two multi-mode vifs with a single-mode vif.
- The IP addresses need to remain the same when the configuration is updated.
- The update should not cause a network service interruption.
