

Backend instability can cause aggregate to go offline in Azure CVO environment

https://kb-stage.netapp.com/cloud/Cloud_Volumes_ONTAP/Back_end_instability_can_cause_aggregat...

Updated: Wed, 24 Jun 2026 07:24:48 GMT

Applies to

- Cloud Volumes ONTAP (CVO) 9.x
- Microsoft Azure

Issue

- Aggregate goes offline when a disk fails due to the aggregate being raid0.
