

Block Services unhealthy, removal of active drives on 2 separate SolidFire nodes

https://kb-stage.netapp.com/on-prem/solidfire/Element_OS_Kbs/Block_Services_unhealthy_removal_o...

Updated: Wed, 24 Jun 2026 08:15:58 GMT

Applies to

- NetApp Element software
- NetApp SolidFire SF-Series product line
- NetApp H-series storage nodes

Issue

- The following alert is seen on NetApp SolidFire Active IQ when **Active** drives on 2 different nodes are physically pulled from the node:
 - Error Code: `blockServiceUnhealthy`

- **Details:** Block service(s) on more than one node are unhealthy. Data unavailability is possible and rebuild may be blocked.
- The cluster is not able to sync the block services in the event of multiple simultaneous drive removals across more than one node
