

Volume move slow or failing in CVO possibly after an ONTAP upgrade

https://kb-stage.netapp.com/cloud/Cloud_Volumes_ONTAP/Volume_move_slow_or_failing_in_CVO_p...

Updated: Wed, 24 Jun 2026 07:24:42 GMT

Applies to

- NetApp Cloud Volumes ONTAP (CVO)
- SnapMirror
- Volume Move
- Deswizzler

Issue

- CVO slow to respond to CLI commands or APIs
- Cloud Manager UI sporadically loses connectivity and may display the following message:

```
Cloud Manager cannot communicate with Cloud Volumes ONTAP because there is no connectivity or because the Cloud Volumes ONTAP system is not available.
```

- Snapmirror updates may sporadically fail and EMS displays errors like `smc.snapmir.schd.trans.overrun`
