

Replication of the volume hosted fails with an error message "Server fault"

https://kb-stage.netapp.com/cloud/ncds/nc/Cloud_Manager/Replication_of_the_volume_hosted_fails_w...

Updated: Wed, 24 Jun 2026 06:32:06 GMT

Applies to

- BlueXP
- Snapmirror
- Amazon FSX for ONTAP

Issue

- Using Cloud Manager replication wizard and when we click the final Replicate button at the end of the wizard there is an error message `Server fault`.
- Both FSx are deployed in the same VPC but in different AZs. All traffic has been allowed in between two FSX.
