

Storage Replication Adapter: Snapmirror snapshots are not being deleted after multiple failover and failback operations

https://kb-stage.netapp.com/data-mgmt/OTV/SRA_Kbs/SRA__Snapmirror_snapshots_are_not_being_...

Updated: Wed, 24 Jun 2026 06:07:59 GMT

Applies to

- VMware Site Recovery Manager (SRM)
- NetApp Storage Replication Adapter (SRA)
- ONTAP 9.6
- ONTAP 9.7

Issue

When performing multiple failover and "failback" operations within SRM / SRA, the following issue is seen:

- New incremental snapmirror snapshots are created during SRM's reprotect operation

- However, old snapmirror snapshots that are no longer needed are not purged
