

How to check Dynamic Port Range for SnapCenter Plug-ins

https://kb-stage.netapp.com/data-mgmt/SnapCenter/SC_KBs/How_to_check_Dynamic_Port_Range_fo...

Updated: Wed, 24 Jun 2026 04:32:34 GMT

Applies to

- SnapCenter
- Dynamic Port Range

Description

In order to deploy Plug-ins, SnapCenter will communicate with host over dedicated TCP ports, the requirements are documented in:

[SnapCenter Connection and port requirements](#)

[Service overview and network port requirements for Windows](#)

In some cases the ports might be changed by Internal Group Policy or by a command/registery. You can manually check which ports are defined as Dynamic Port Range
