

After vCenter upgrade from 6.7 to 7.0.3c custom workflow is not executing properly

https://kb-stage.netapp.com/Legacy/OnCommand_Suite/After_vCenter_upgrade_from_6.7_to_7.0.3c_...

Updated: Wed, 24 Jun 2026 07:13:59 GMT

Applies to

- Work Flow Automation (WFA) 5.1.0.0.2
- Active IQ Unified Manager 9.9

Issue

- After upgrading vCenter from version 6.7 to 7.0 Update 3, WFA throws the following error on workflow execution:

```
Cannot validate argument on parameter 'Id'. The argument is null or empty.  
Provide an argument that is not null or empty, and then try the command  
again. Location: Row '44' step 'EEOD - Mount RDM'.
```
