Applies to

Cloud Sync

Issue

Cloud Sync data broker services may stop running or fail to start under some scenarios. In some cases, this could be due to insufficient memory in the data broker host. Below is a data broker log which matches that situation:

```
[2022-07-07T10:02:04.461] [ERROR] [MASTER] [0] [32142] Got uncaught exception  
Error: spawn ENOMEM  
at ChildProcess.spawn (internal/child_process.js:405:11)  
at spawn (child_process.js:677:9)  
at Object.execFile (child_process.js:311:17)
```

```
at exec (child_process.js:212:25)
at /opt/netapp/databroker/node_modules/systeminformation/lib/network.js:1249:13
at processTicksAndRejections (internal/process/task_queues.js:77:11) {
  errno: -12,
  code: 'ENOMEM',
  syscall: 'spawn'
}
```
