

Is HDD and SSD firmware updated automatically on drive insertion into a SANtricity storage system?

https://kb-stage.netapp.com/on-prem/E-Series/SANtricity-OS-KBs/Is_HDD_and_SSD_firmware_update...

Updated: Wed, 24 Jun 2026 07:24:33 GMT

Applies to

- E-Series
- SANtricity 11.7 and earlier

Answer

- No. After drive failure, a replacement drive may not be on the latest firmware revision.
- If the replacement drive has an earlier firmware revision than what is currently installed, drive firmware will **not** be upgraded automatically.
- Follow [E-Series SANtricity drive update procedures](#) if necessary, to manually upgrade drive firmware after replacement.
