

SMSQL backup failing with an error "Remote backup failed with Exception, Error code: 0x80131501"

https://kb-stage.netapp.com/Legacy/SnapManager_Suite/SMSQL_backup_failing_with_an_error_%22...

Updated: Wed, 24 Jun 2026 07:24:39 GMT

Applies to

- SnapManager for SQL (SMSQL)
- Microsoft SQL Server

Issue

- SnapManager for SQL backup failing with errors:
`[...] Maximum worker threads setting for [<server_name\server_instance>] = 1280`

[...] Current worker threads number for [<server_name\server_instance>] = **1982**

[...] The number of databases selected for concurrent backup exceeds the maximum number of SQL Server worker threads that are available on the SQL Server <server_name\server_instance> to perform this backup.

[...] specify 'Modify SQLServer maximum worker threads parameter' option to increase the maximum worker threads for the SQL Server <server_name\server_instance>.

[...] Remote backup failed with Exception, Error code: **0x80131501**
