

How to disable TLSv1.1 in Data Broker or SnapCenter Plug-in for VMware vSphere

https://kb-stage.netapp.com/data-mgmt/SnapCenter/SC_KBs/How_to_disable_TLSv1.1_in_Data_Brok...

Updated: Wed, 24 Jun 2026 07:14:02 GMT

Applies to

- NetApp Data Broker (NDB) 1.x
- SnapCenter Plug-in for VMware vSphere (SCV)

Description

NDB and SCV have TLSv1.1 enabled for backwards compatibility of older VMware versions. Some customer's security environment requires disabling TLSv1.1 for compliance.
