

MetroCluster ip 4 8 4 migration takeover not possible nvidia sn2100 switch

https://kb-stage.netapp.com/on-prem/ontap/mc/MC-KBs/MetroCluster_ip_4_8_4_migration_takeover_n...

Updated: Wed, 24 Jun 2026 07:24:46 GMT

Applies to

- MetroCluster IP
- ONTAP 9
- 4-8-4 migration
- NVIDIA SN2100 switches

Issue

The procedure for the migration is followed but `storage failover show` shows the following:

```
c102::*> storage failover show  
Takeover
```

Node	Partner	Possible	State Description
-----	-----	-----	-----
c102-01	c102-02	false	Waiting for c102-02, Takeover is not possible: Storage failover interconnect error, NVRAM log not synchronized, Disk inventory not exchanged
c102-02	c102-01	false	Waiting for c102-01, Takeover is not possible: Storage failover interconnect error, NVRAM log not synchronized, Disk inventory not exchanged
c101-01	c101-02	true	Connected to c101-02
c101-02	c101-01	true	Connected to c101-01
