

## CONTAP-205079: Flexgroup volume delete fails with an error message busy constituent volume

<https://kb-stage.netapp.com/on-prem/ontap/da/S3/S3-Issues/CONTAP-205079>

Updated: Wed, 22 Apr 2026 02:10:17 GMT

### Issue

-Deletion of Flexgroup volume failed with an error message as below:

mgwd: mgmtgwd.fg.modify.constituent.fail:error]: Failed to modify the state of FlexGroup constituent Flexgroupvol\_001 in Vserver svm1. Reason: Unable to set volume attributes for volume "Flexgroupvol\_0001" on Vserver "svm1". Reason: Volume busy.

- Failed to modify Volume constituent state with below error message:  
vol offline: Error offlining volume "svm1:Flexgroupvol\_001". Modification not permitted. Unable to determine the state of the volume. This can be because of network connectivity problems or the volume is busy.
