

Will auto grow configuration be transferred to destination in SVM-DR?

https://kb-stage.netapp.com/on-prem/ontap/DM/Efficiency/Efficiency-KBs/Will_auto_grow_configuration...

Updated: Wed, 24 Jun 2026 07:24:41 GMT

Applies to

SVM-DR

Answer

- No. In SVM-DR or XDP SnapMirror, source and destination manage space separately. The auto grow will not be transferred to destination in SVM-DR.
- The auto grow option should be configured on destination separately.
