

Unable to restore to new volume from Snapmirror Vault in System Manager but CLI works

https://kb-stage.netapp.com/on-prem/ontap/DM/System_Manager/SM-KBs/Unable_to_restore_to_new...

Updated: Wed, 24 Jun 2026 07:24:36 GMT

Applies to

- ONTAP System Manager
- SnapMirror
- SnapMirror Vault

Issue

- Restore of a Snapshot from a SnapMirror Vault fails on System Manager with error message:

```
Failed to create a destination endpoint for the restore operation. Reason:  
Failed to identify aggregate on which to create volume <new volume name>.
```

(Unable to find a suitable aggregate for volume "new volume name" in Vserver <Target Vserver>. Reason: No suitable storage can be found for the specified requirements. Aggregates not on the Vserver's aggregate list: <A list of aggregates> Aggregates not matching FabricPool requirements: <A list of aggregates>.)

- Selected `Create new Volume` option
- Restoring with the same parameters over the CLI works
