

## A release of a SnapMirror relationship requires a relationship ID to complete

[https://kb-stage.netapp.com/on-prem/ontap/DP/SnapMirror/SnapMirror-KBs/A\\_release\\_of\\_a\\_SnapMirr...](https://kb-stage.netapp.com/on-prem/ontap/DP/SnapMirror/SnapMirror-KBs/A_release_of_a_SnapMirr...)

Updated: Wed, 24 Jun 2026 06:32:05 GMT

### Applies to

- SnapMirror
- SnapMirror release
- relationship ID

### Issue

- While in the process of running the command "`snapmirror release -destination-path`" on the source side, the following error happened:
  - `src::> snapmirror release -destination-path dst_SVM:dst_volume`  
`Error: command failed: "dst_SVM:dst_volume" does not specify a unique`

destination. Use "-relationship-id" to indicate a specific destination.
