### Applies to

- ONTAP Tools for VMware vSphere (OTV) 9.12 and higher
- Storage Replication Adapter (SRA) 9.12 and higher
- VMware Site Recovery Manager (SRM)
- VMware Cloud Foundation Mode (VCF)

### Description

In OTV 9.12, a new API was introduced to generate the **appliance-api-token** that authenticates API calls. Some of the existing APIs were modified to include the **appliance-api-token** header due to security enhancements implemented in the latest OTV releases. This article describes how to generate OTV's **appliance-api-token** using the Swagger-UI.
