

Is it possible to change the customer managed Key Vault and Keys on storage account in Azure?

https://kb-stage.netapp.com/cloud/ncds/Cloud_Backup_Service/Is_it_possible_to_change_the_custom...

Updated: Wed, 24 Jun 2026 07:24:39 GMT

Applies to

- BlueXP Backup and Recovery (formerly Cloud Backup Service)
- Microsoft Azure

Answer

Changing the [Azure Keys](#) and [Azure Key Vault](#) after first deployment is not supported.

Additional Information

To change the Azure Keys/Vault :

1. Create new customer-manager keys/vault.
2. Deactivate cloud backup for the target working environments and delete all backups.
3. Configure new Cloud backup to Azure for the target working environments by selecting the new customer-managed keys during the setup wizard.
