

Is it possible to support modifying individual session bandwidth on backup and recovery?

https://kb-stage.netapp.com/cloud/ncds/Cloud_Backup_Service/Is_it_possible_to_support_modifying_i...

Updated: Wed, 24 Jun 2026 06:32:07 GMT

Applies to

- NetApp BlueXP backup and recovery
- NetApp Cloud Backup service

Answer

- No, it is not possible to support modifying individual session bandwidth on NetApp BlueXP backup and recovery.
- Modifying the whole session bandwidth can be supported.

Additional Information

Refer to **Change the network bandwidth available to upload backups to object storage** in [Manage backup-to-object storage options in the Advanced Settings page](#) for instructions on how to modify the network bandwidth.
