

## ACC replication initializes, but doesn't update in version 23.07 with Trident

[https://kb-stage.netapp.com/cloud/Astra/Trident/ACC\\_replication\\_initializes\\_but\\_doesn\\_t\\_update\\_in\\_ve...](https://kb-stage.netapp.com/cloud/Astra/Trident/ACC_replication_initializes_but_doesn_t_update_in_ve...)

Updated: Wed, 24 Jun 2026 06:32:10 GMT

### Applies to

- Astra Control Center (ACC) 23.07.1
- Astra Trident 23.07.1

### Issue

After setting up ACC on Openshift with an application backup with replication, the replication starts, but doesn't keep replicating, and failover doesn't work.

The following Description entry in the failure event "`Replication failed`" can be found in the nautilus logs:

```
Replication for managed application 'application-<HEXCODE>' on cluster
```

```
'<KUBERNETES_CLUSTER_NAME>:6443' failed: failed to start: Backend  
<ONTAP_IP_ADDRESS>(<BACKEND_NAME>) associated with trident backend  
<BACKEND_UUID> is not managed
```
