

Block User Access does not work with error "Reason vserver svm name not found"

https://kb-stage.netapp.com/cloud/ncds/DII/Block_User_Access_does_not_work_with_error_Reason_v...

Updated: Wed, 24 Jun 2026 06:32:08 GMT

Applies to

Cloud Insights Storage Workload Security

Issue

When attack is detected or **Block User** button is pressed, Block User Access fails with error:
`SID to DomainName transformation failed. Reason vserver svm name not found`
