

Can't delete volume as it is being used in a snapmirror relationship for cloud backup service

https://kb-stage.netapp.com/cloud/Cloud_Volumes_ONTAP/Can_t_delete_volume_as_it_is_being_use...

Updated: Wed, 24 Jun 2026 07:24:45 GMT

Applies to

- Cloud Volumes ONTAP (CVO)
- Cloud Backup Service (CBS)
- SnapMirror

Issue

Deletion of a cloud backed up volume is failing with the below error :

Error:Volume "volume name" in Vserver "vserver name" is the destination or source endpoint of one or more SnapMirror relationships. Before you can delete the volume, you must delete the relationships for which it is the destination

endpoint, and release the source information for the relationships for which it is the source endpoint using "snapmirror release".
