

Unable to create aggregate in BlueXP with "Name does not resolve" error

https://kb-stage.netapp.com/cloud/Cloud_Volumes_ONTAP/Unable_to_create_aggregate_in_BlueXP_...

Updated: Wed, 24 Jun 2026 07:24:43 GMT

Applies to

- BlueXP
- Microsoft Azure Cloud Volumes ONTAP (CVO)

Issue

- Attempting to create a new aggregate fails with the following error:
 - `Name does not resolve`
- In the BlueXP connector server.log file, the following error may appear:

```
2023-07-30 UTC ERROR [Standalone] [xxxx] [ ] [System] (gcp-identity-
akka.actor.default-dispatcher-5)
  [GcpConcreteClient$:146] failed to get metadata request with error
java.net.UnknownHostException:
  metadata.google.internal: Name does not resolve
```
