

## How to swap ISLs between fabrics in a 7- Mode fabric MetroCluster using 1 ISL per fabric

[https://kb-stage.netapp.com/on-prem/ontap/OHW/OHW-KBs/How\\_to\\_swap\\_ISLs\\_between\\_fabrics\\_in\\_...](https://kb-stage.netapp.com/on-prem/ontap/OHW/OHW-KBs/How_to_swap_ISLs_between_fabrics_in_...)

Updated: Wed, 24 Jun 2026 07:24:47 GMT

### Applies to

- Data ONTAP 7-Mode
- Metrocluster

### Description

This procedure describes how to prepare the filers for a non-disruptive physical ISL connection swap between two fabrics each with a single ISL in a MetroCluster environment for the purpose of determining the origin of transport errors on ISL ports (E-ports). This procedure requires having all ISLs down for some time, which will compromise site redundancy.
